

Arlo Solar Panel – Birdhouse Roof Mount Installation (Quick Guide)

Arlo Solar Panel Model: VMA7600

TML Fun Creations | Custom 3D-Printed Camera Housings and Accessories

1. Place the Arlo Solar Panel face-down and route the cable through the center opening in the birdhouse roof.
2. Insert the mounting screw through the roof from the inside.
3. Position the solar panel mounting slot over the screw on the exterior of the roof.
4. Install the washer(s) and thread the adjustment knob onto the screw.
5. Tighten until snug and adjust panel angle for best sunlight. Do not overtighten.
6. Verify cable slack inside the housing and confirm the panel sits flush.

Designed for Arlo Solar Panel model VMA7600 when used with TML Fun Creations birdhouse-style roofs.

Use exterior-grade silicone if installing in high-rain environments.

Ensure panel faces direct sunlight for optimal charging.

All wiring should remain inside the housing.
