

Ring Spotlight Camera Housing - Installation Guide (Quick Guide)

TML Fun Creations | Custom 3D-Printed Camera Housings and Accessories

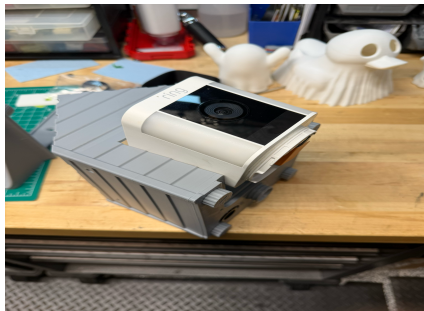

1. Remove the original mounting base from the Ring Spotlight Camera.
2. Install the mounting base provided with the camera housing.
3. Insert the camera into the housing by pushing it through the front opening. It is designed to be a tight fit.
4. Install the provided M4 thumbscrew from inside the housing and tighten until snug. Do not overtighten.

Step 1: Remove factory mounting base

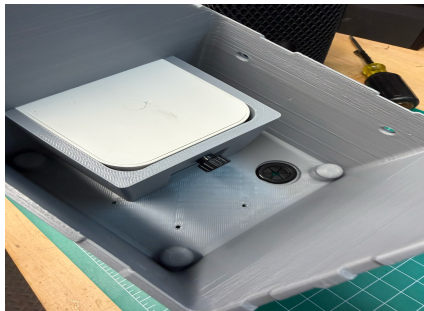

Step 2: Install provided mounting plate

Step 3: Insert camera into housing

Step 4: Install M4 thumbscrew

Step 4 (continued): Thumbscrew installed from inside housing

- Housing is designed for a snug fit to prevent movement
- Tight fit is intentional to keep the camera secure
- Do not overtighten mounting hardware
